

Project Design Phase-I Solution Architecture

Date	19 September 2022
Team ID	PNT2022TMID29008
Project Name	Project-Personal Assistance for Seniors Who Are Self-Reliant
Maximum Marks	4 Marks

As people become older, people generally will experience a health decline such as becomes weak, susceptible to disease, decreased vision ability, etc. Therefore, special health attention is needed for the elderly people, especially from the family member or personal doctors / nurses. On the other hand, the number of elderly people in the world is rapidly increase so there's more people will need special attention. Therefore, this research try to develop an application on mobile phone that could help elderly people and their family member to supervise and monitor the health of the elderly.
